C.

Res

- Cognitive control and task performance
  - Network interactions and evidence in human systems
  - Experimental design and behavioral performance
  - Visual object recognition
  - Working memory and executive function
  - Attention
  - Episodic memory encoding and retrieval
  - Experimental design
  - Language processing and semantic knowledge
  - Action observation and imitation
  - Alcohol cue reactivity
  - Spatial cognition
  - Blindness and vision
  - Temporal dynamics of stimulus processing
  - Multisensory integration and perception
  - Resting state networks
  - Priming and repetition effect
  - Mental imagery and math abilities
  - Phonological processing in reading
  - Abstract categories and representations
  - Gesture recognition and visual attention
  - Deafness and sign language
  - Visual perception of motion and form
  - Facial and voice recognition
  - Cognitive control and interference
  - Rule-based performance and complexity
  - Moral decision making and phobias
  - Speech and language processing
  - Cognitive functions and role playing
  - Social cognition/judgment
  - Social interaction and contextual behavior
  - Sentence comprehension and syntax
  - Menstrual cycle and hormonal regulation
  - Relational reasoning and fluid intelligence
  - Eye movements and visual attention
  - Sensorimotor integration and movement control
  - Working memory and error monitoring
  - Music perception and auditory processing
  - Skill learning and expertise
  - Effective causal modeling of neural networks
  - Inhibition and gender differences
  - Color perception and deception
  - Pain perception and sensory stimulation
  - Fear conditioning and extinction
  - Cognitive performance and control
  - Autism Spectrum Disorder (ASD) and social impairments
  - Emotional processing and regulation
  - Reward and decision making
  - Social perception and empathy
  - Affective valence and feedback processing
  - ADHD and attention deficits
  - Developmental aging and maturation
  - Sleep and olfactory processing
  - Autobiographical memory in epilepsy
  - Evidence and effect in behavioral studies
  - Eating and body weight
  - PTSD and trauma
  - Body and primates
  - Somatosensory stimulation and motor control
  - Stress and physiological responses
  - Tinnitus and hearing loss
  - Resting-state brain activity in smokers
  - Neurobiological variability and individual differences
  - Pharmacological effects of placebo and drug administration
  - Alzheimer's disease and mild cognitive impairment
  - Therapeutic interventions and training
  - Neural oscillations and electrophysiology
  - Personality and anxiety
  - Language laterality
  - Genetic risk and familial factors in psychosis
  - Genetic polymorphisms and risk factors
  - Drug addiction and substance abuse
  - Major depression disorder and emotions
  - Neuroimaging and metabolism
  - Mental disorders and controls
  - Neuroimaging techniques
  - Neurodegenerative diseases and disorders
  - Abnormalities in schizophrenia
  - Lesion and stroke rehabilitation
  - Structural MRI and brain volume analysis
