

Condition

Component				
1	2	3	4	5
<div></div> Cognitive control and task performance	<div></div> Social cognition/judgment	<div></div> Cognitive performance and control	<div></div> Pain perception and sensory stimulation	<div></div> Emotional processing and regulation
Network interactions and evidence in human systems	<div></div> Sentence comprehension and syntax	<div></div> Cognitive control and interference	<div></div> Music perception and auditory processing	Structural MRI and brain volume analysis
Experimental design and behavioral performance	<div></div> Autobiographical memory in epilepsy	<div></div> Reward and decision making	<div></div> Somatosensory stimulation and motor control	<div></div> Major depression disorder and emotions
<div></div> Visual object recognition	<div></div> Resting state networks	<div></div> Working memory and executive function	<div></div> Speech and language processing	<div></div> Personality and anxiety
<div></div> Working memory and executive function	<div></div> Emotional processing and regulation	Relational reasoning and fluid intelligence	<div></div> Sensorimotor integration and movement control	Eating and body weight
<div></div> Attention	<div></div> Cognitive performance and control	Experimental design and behavioral performance	<div></div> Spatial cognition	Alzheimer's disease and mild cognitive impairment
<div></div> Visual object recognition	<div></div> Episodic memory encoding and retrieval	<div></div> Working memory and executive function	<div></div> Mental imagery and math abilities	<div></div> Episodic memory encoding and retrieval
<div></div> Working memory and executive function	<div></div> Autobiographical memory in epilepsy	<div></div> Cognitive performance and control	<div></div> Attention	<div></div> Social cognition/judgment
<div></div> Cognitive control and task performance	<div></div> Social cognition/judgment	<div></div> Cognitive control and interference	<div></div> Visual object recognition	<div></div> Resting state networks
Network interactions and evidence in human systems	<div></div> Resting state networks	<div></div> Pain perception and sensory stimulation	<div></div> Visual perception of motion and form	<div></div> Autobiographical memory in epilepsy
Experimental design and behavioral performance	<div></div> Sensorimotor integration and movement control	<div></div> Episodic memory encoding and retrieval	<div></div> Cognitive performance and control	Pharmacological effects of placebo and drug administration
Network interactions and evidence in human systems	<div></div> Visual perception of motion and form	<div></div> Resting state networks	<div></div> Working memory and executive function	<div></div> Pain perception and sensory stimulation
<div></div> Cognitive control and task performance	<div></div> Visual object recognition	<div></div> Autobiographical memory in epilepsy	<div></div> Mental imagery and math abilities	<div></div> Reward and decision making
<div></div> Language processing and semantic knowledge	<div></div> Eye movements and visual attention	Alzheimer's disease and mild cognitive impairment	<div></div> Cognitive control and interference	Stress and physiological responses
<div></div> Episodic memory encoding and retrieval	<div></div> Spatial cognition	<div></div> Social cognition/judgment	<div></div> Attention	<div></div> Somatosensory stimulation and motor control
<div></div> Social cognition/judgment	<div></div> Social cognition/judgment	<div></div> Pain perception and sensory stimulation	<div></div> Pain perception and sensory stimulation	<div></div> Reward and decision making
Network interactions and evidence in human systems	<div></div> Autobiographical memory in epilepsy	<div></div> Cognitive control and interference	<div></div> Somatosensory stimulation and motor control	<div></div> Personality and anxiety
<div></div> Priming and repetition effect	<div></div> Resting state networks	<div></div> Working memory and executive function	<div></div> Music perception and auditory processing	Abnormalities in schizophrenia
<div></div> Sentence comprehension and syntax	<div></div> Episodic memory encoding and retrieval	<div></div> Cognitive control and task performance	<div></div> Sensorimotor integration and movement control	<div></div> Fear conditioning and extinction
<div></div> Multisensory integration and perception	Genetic risk and familial factors in psychosis	<div></div> Cognitive performance and control	<div></div> Speech and language processing	<div></div> Major depression disorder and emotions

Condition		Classification	
<div></div> Intact	<div></div> Cognitive control	<div></div> Spatial cognition	
<div></div> Paragraph	<div></div> Language processing	<div></div> Attention	
<div></div> Word	<div></div> Memory	<div></div> Reward	
<div></div> Rest	<div></div> Emotion	<div></div> Sensory perception	
	<div></div> Social cognition	<div></div> Motor control	
		<div></div> Resting state
