<ul> <li>Cognitive control and task performance</li> </ul>		Speech and language processing	Evidence and effect in behavioral studies
<ul> <li>Network interactions and evidence in human systems</li> </ul>		Cognitive functions and role playing	Eating and body weight
<ul> <li>Experimental design and behavioral performance</li> </ul>		Social cognition/judgment	PTSD and trauma
<ul><li>Visual object recognition</li></ul>		Social interaction and contextual behavior	Body and primates
<ul> <li>Working memory and executive function</li> </ul>		Sentence comprehension and syntax	Somatosensory stimulation and motor control
<ul><li>Attention</li></ul>		Menstrual cycle and hormonal regulation	Stress and physiological responses
<ul> <li>Episodic memory encoding and retrieval</li> </ul>		Relational reasoning and fluid intelligence	Tinnitus and hearing loss
Experimental design		Eye movements and visual attention	Resting-state brain activity in smokers
<ul> <li>Language processing and semantic knowledge</li> </ul>		Sensorimotor integration and movement control	Neurobiological variability and individual differences
Action observation and imitation		Working memory and error monitoring	Pharmacological effects of placebo and drug administration
Alcohol cue reactivity		Music perception and auditory processing	Alzheimer's disease and mild cognitive impairment
Spatial cognition		Skill learning and expertise	Therapeutic interventions and training
Blindness and vision		Effective causal modeling of neural networks	Neural oscillations and electrophysiology
<ul> <li>Temporal dynamics of stimulus processing</li> </ul>		Inhibition and gender differences	Personality and anxiety
<ul> <li>Multisensory integration and perception</li> </ul>		Color perception and deception	Language laterality
Resting state networks		Pain perception and sensory stimulation	Genetic risk and familial factors in psychosis
Priming and repetition effect		Fear conditioning and extinction	Genetic polymorphisms and risk factors
Mental imagery and math abilities		Cognitive performance and control	Drug addiction and substance abuse
<ul> <li>Phonological processing in reading</li> </ul>		Autism Spectrum Disorder (ASD) and social impairments	Major depression disorder and emotions
<ul> <li>Abstract categories and representations</li> </ul>		Emotional processing and regulation	Neuroimaging and metabolism
Gesture recognition and visual attention		Reward and decision making	Mental disorders and controls
Deafness and sign language		Social perception and empathy	Neuroimaging techniques
<ul> <li>Visual perception of motion and form</li> </ul>		Affective valence and feedback processing	Neurodegenerative diseases and disorders
Facial and voice recognition		ADHD and attention deficits	Abnormalities in schizophrenia
Cognitive control and interference		Developmental aging and maturation	Lesion and stroke rehabilitation
Rule-based performance and complexity		Sleep and olfactory processing	Structural MRI and brain volume analysis
Moral decision making and phobias		Autobiographical memory in epilepsy	·
